SUMMARY

Full Stack Developer with experience building and deploying web applications using Java Spring Boot, Django, and React. Skilled in REST API development, JWT authentication, role-based access control, third-party API integrations, and cloud deployment. Strong foundation in OOP, DSA, and core CS fundamentals with a B.Tech specialization in Cyber Security.

EDUCATION

St. Mary's College, Hyderabad

B.Tech in Computer Science & Engineering: Cyber Security

Hyderabad, India

Dec 2021 – Aug 2025

- Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems, Network Security, Web Security, Authentication & Authorization

WORK EXPERIENCE

KodNest

Full Stack Developer Intern

Bengaluru, India (Remote)

Sep 2025 – Apr 2026

- Built **REST APIs for product management, shopping cart, and user authentication** using Spring Boot and PostgreSQL for a production-level e-commerce application
- Configured **JWT authentication and Spring Security** to handle role-based access control across admin and customer routes
- Integrated **Brevo Email API** for transactional password reset emails and **Razorpay** for payment processing
- Containerized the app with **Docker**, deployed on Render with Neon PostgreSQL, and fixed environment issues to maintain stable uptime
- Took part in code reviews and debugging sessions, resolving issues across frontend and backend layers

PROJECTS

Sales Savvy | Java, Spring Boot, Spring Security, JWT, PostgreSQL, Docker, Render

[GitHub](#) | [Live](#)

- Full-stack e-commerce platform with **7 controllers and 20+ REST API endpoints** covering login, product listing, cart, admin panel, password reset, and payment flow
- Spring Security with JWT for endpoint protection and role-based authorization; **Brevo Email API and Razorpay** integrated; Dockerized and deployed on Render with Neon PostgreSQL

Cravio | Python, Django, PostgreSQL, Render

[GitHub](#) | [Live](#)

- Food ordering and restaurant management app with a **customer-facing order flow** and a separate admin dashboard for managing restaurants and menus; deployed on Render with PostgreSQL

Planora | React, JavaScript, Vite, Vercel

[GitHub](#) | [Live](#)

- Task management app in React with **dynamic state handling** and a clean dashboard UI; built with Vite and deployed on Vercel with CI/CD via GitHub

ACHIEVEMENTS & CERTIFICATIONS

- Solved **250+ DSA problems** on LeetCode, Codeforces, and GeeksforGeeks covering arrays, linked lists, trees, sorting, recursion, and dynamic programming
- Represented college at **inter-collegiate hackathon events**, working in teams to build and deliver software prototypes under time-constrained conditions
- Gained hands-on experience in Java & Python full stack development covering REST APIs, web development, SQL, and testing — **KodNest, Apr 2026** [View](#)
- Learned network scanning, exploitation techniques, and web application attack vectors through a 15-hour practical ethical hacking program — **Udemy, Mar 2023** [View](#)

TECHNICAL AND NON-TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS, SQL.

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate/JPA, Django, React.js.

Backend & APIs: REST APIs, JWT Authentication, Role-Based Access Control, MVC Architecture, Brevo Email API, Razorpay.

Databases: PostgreSQL, MySQL, SQLite.

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Render, Vercel, Neon PostgreSQL.

Core Concepts: Object-Oriented Programming, Data Structures & Algorithms, DBMS, Computer Networks, Operating Systems.

Cyber Security: Network Security, Web Security, Ethical Hacking, Authentication & Authorization, HTTP/HTTPS.
